

Denso®

Denso Rock Shield

Protective Pipeline Mesh

Uses & Applications

- Provides protection of external corrosion coating on pipelines when rocky backfill is encountered
- Lightweight material that is manufactured to withstand extreme weather conditions and temperatures

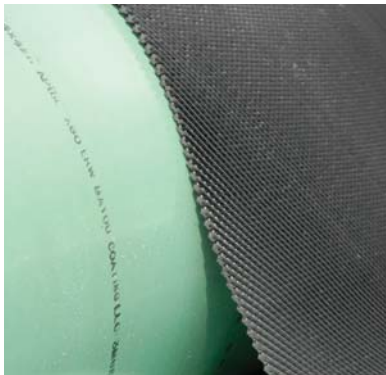

Denso Rock Shield

Denso Rock Shield SD can be easily applied and provides compressive strength and flexibility.

Denso Rock Shield HD is essential where pipelines are constructed through rocky terrain.

Denso Rock Shield HD protects the pipes anti-corrosion coating.

Features

- Flexible for easy handling even at low temperatures
- Lightweight
- Porous mesh allows water flow for cathodic protection and testing
- Inert and environmentally stable
- High impact strength and tensile strength
- Cost effective protection for pipeline coatings
- Available in rolls or pads

Denso Rock Shield SD in action, protecting the pipe coating.
