

PROTAL™ 7900HT REPAIR CARTRIDGE (400 ml)

High Temperature Pipeline Repair Coating

Description

Protal 7900HT Repair Cartridge (400 ml) is a VOC free, 100% solids, 2 part epoxy coating specially formulated for patching and repairing damaged FBE and other liquid coated pipelines. operating at higher temperatures. It cures fast to allow quick backfill when applied to hot pipe. The repair cartridges are packaged in 2-component tubes that are applied with a dispensing gun (sold separately).

Uses

Repair coating for damaged FBE and other liquid coated pipelines operating at elevated temperatures. Also used as coating of cadweld areas.

Features

- High build (up to 60 mils / 1524 microns in one coat)
- Excellent adhesion
- Intermittent service temperature up to 300°F (150°C)
- Very low permeability
- High abrasion resistance
- Safe and environmentally responsible
- Does not shield cathodic protection
- CSA Z245.30 compliant
- Meets AWWA C-210-92 Standard
- Outstanding self-leveling characteristics

Application

Surface shall be roughened approximately 1" (25 mm) around all repair areas using a Carborundum cloth or 60 to 80 grit sandpaper and then remove the remaining dust with a clean, dry cloth, brush or clean compressed air. Material can be applied by injecting material into a small container and mixing until a uniform color is achieved or utilizing the Protal Static Mixing Tip. Material can then be brush applied to specified mil thickness (minimum 25 mils / 635 microns). Cure times are dependent on temperature and will be extended at cooler temperatures.
