

New Denso Perforating Tool

Denso is now offering our new 20 row porcupine style perforating tool. Professional quality 6.5" tall with all metal body. Very Light weight. Sharp thin rotating points made from quality Brass with a chrome plated finish. Wheels turn very easily to perforate the Denso Poly-Wrap with ease. The roller consists of 20 individual spindles with sharp pins evenly spaced out which rotate when rolled against the surface of the Poly-Wrap, allowing large areas to be punctured quickly and uniformly.

20 individual spindles to quickly release excess resin, moisture, and CO₂ from the reaction to escape

Light weight metallic handle.
