

SEASHIELD SERIES FX-70®

STEEL, CONCRETE & TIMBER STRUCTURAL PILE REPAIR PROTECTION SYSTEM

SUITABLE FOR:

- Wharf Piles
- Bridge Columns
- Water and Wastewater Facilities
- Marine and Port Structures
- Support Members, Bracing and Brackets
- Piles Installed Underwater and in Dry Environments
- Piles of Most Any Shape and More

FEATURES:

THE FIRST IN-PLACE REPAIR SOLUTION FOR DAMAGED CONCRETE, STEEL AND WOOD PILES WHEN IT DEBUTED IN 1970

The first to use a custom-made tongue-and-groove seamed fiberglass jacket with a high-strength, water resistant repair grout. The system has extensive 45+ years of proven performance for timber, steel and concrete pile applications. The SeaShield Series FX-70 pile repair and protection system is a cost-effective, practical and long-term solution for your repair projects.

- Economically repair damage in place — no need for costly cofferdams or dewatering
- High-strength, water-insensitive materials bond well to concrete, timber and steel pilings
- Structure can generally remain in service while the repair is executed
- Protective system prevents corrosion, deterioration, weathering and erosion
- Safe for use in marine-life habitats
- Easily blends with existing structure
